## MUV - MINE UTILITY VEHICLE

The MÜV side-by-side utility vehicle by Hoffman Manufacturing, Inc. has been developed to withstand the rigors of underground mine use. UTV's provide a great platform for underground transportation, but few are built to withstand the harsh conditions experienced in underground use. We have studied many common failure points and maintenance issues including suspension, rolling assemblies, cargo boxes, and overall ergonomics to develop robust components and solutions for each. The MÜV includes engineered solutions and high quality components to deliver the toughest side-by-side utility vehicle available.

### KEY FEATURES

- Engineered suspension bushings
- Kohler tier 4 diesel
- Master disconnect switch
- Wheel chocks
- Fabricated A-Arms
- Duraclutch w/descent control
- LED whip
- Run-flat 12 ply tires
- Automated lubrication system
- Vision-X LED lighting
- LED strobe
- Fabricated body armor
- Aftermarket wheel bearings
- Aftermarket ball joints
- Backup alarm
- Multiple configurations available
- Sealed front hubs
- Heavy duty cargo box
- Horn
- 5 lb. ABC Extinguisher
